What is a Point-In-Time Count (PIT)?

- A snapshot of how many homeless individuals are in your community on a single day.
- On the local level, point-in-time counts help communities plan services and programs to appropriately address local needs, measure progress in decreasing homelessness, and identify strengths and gaps in a community's current homelessness assistance system.

EXTENT

Unsheltered PIT Count

The unsheltered PIT survey requires volunteers to identify homeless people that are living in places not meant for human habitation, such as:

- On the street
- In abandoned buildings
- In their vehicles
- In tents/shanties
- Public parks
- In the woods
- Transportation stations

Unsheltered PIT – Survey Steps

There are **five** steps to completing an unsheltered PIT count survey. As an unsheltered volunteer you should:

1. Identify yourself, engage potential participants and explain the purpose of the count.
2. Deliver the script and the consent process. Obtain verbal consent to proceed.
3. Ask the screening questions. Determine if the individual is eligible.
 - Has anyone asked you questions about experiencing homelessness?
 - Where are you sleeping tonight?
4. If eligible, administer the survey questions, recording the participant's responses. If ineligible, thank them for their time and move on.
5. Thank the respondent for their participation. If possible, provide the participant with donated items.

Unsheltered PIT – Sample Script

Hello, my name is _____, and I am helping _____conduct a short survey of our community. We would like to learn more about people experiencing homelessness, what kinds of problems they face, and to see what services are needed to address homelessness.

Your participation is strictly voluntary, and all of your responses are confidential. Your privacy will be protected and respected. If questions make you uncomfortable you do not have to answer them. Would you be willing to take a few minutes to answer some questions?
