

2021 Texas Balance of State Continuum of Care Sheltered Point-in-Time (PIT) Count

The Annual Point-in-Time Count (PIT) was conducted on January 28th, 2021.

This year the CoC opted to only conduct a sheltered count due to complications from COVID-19. The PIT Count aims to provide a snapshot of the individuals and families experiencing homelessness in a geographical area, over the course of one night. Survey responses are self-reported and/or observed and may not be representative of the entire homeless population. The TX BoS CoC is made up of all service providers, advocates, local government officials, and citizens who work to eliminate homelessness in 215 of Texas' 254 counties.

Methodology

Since the CoC Board voted to opt out of the unsheltered count, the only count represented in this report is the sheltered count (individuals and families staying in emergency shelter or transitional housing).

For reporting purposes, HUD requires that CoC's report on their full geography. Due to the size of our CoC, we are not able to achieve full coverage during the PIT count for either the unsheltered or sheltered counts. That being said, the CoC has to employ an extrapolation method that estimates the PIT number for the entire geography.

What is a Non-Random Sample + Extrapolation Methodology?

A non-random sample does not statistically represent the entire population, but if the non-random sample covers a large portion of the population or subpopulation believed to have similar characteristics (e.g., sheltered youth), extrapolation to derive estimates for the entire population or subpopulation is likely to be accurate.

Extrapolation Process

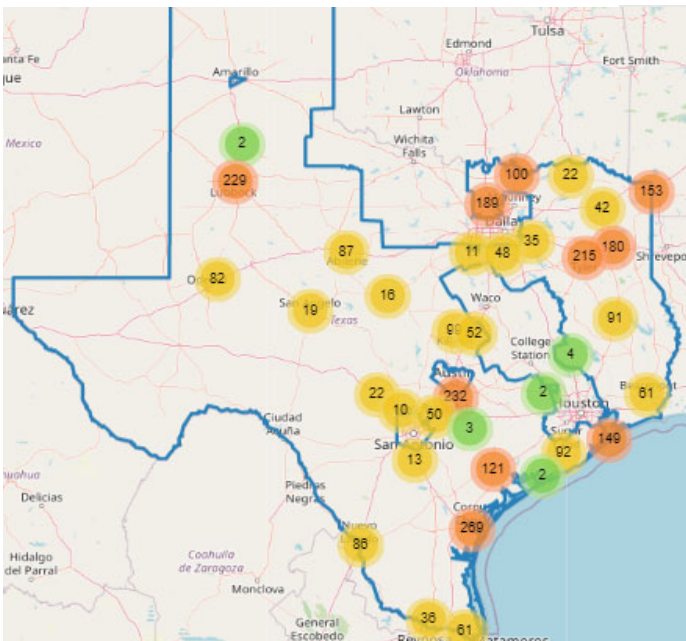

Formula:

$$\left(\frac{\text{Population size of non-participant community}}{\text{Population size of participant community}} \right) \times \text{\# of surveys collected in participant community} = \text{Estimated Total}$$

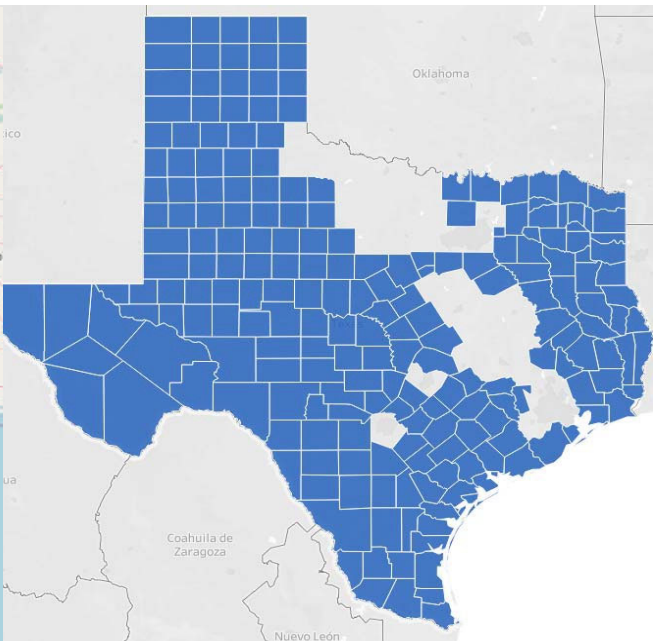

Extrapolation Steps:

- 1) Match non-participant community population sizes to participant community population sizes.
- 2) Calculate estimated Total number of surveys in each non-participant community.
- 3) Use the Housing Inventory Count data to determine household breakdown and the household multipliers.
- 4) Use the data gathered in steps two and three to extrapolate the household demographic information for the non-participant regions.
- 5) Upload extrapolated data into HDX for HUD to review.

Participating PIT Regions

TX BoS CoC Region

Households with Adults and Children

	Sheltered		Total
	Emergency	Transitional	
Total number of households	229	133	362
